Research

I am an assistant professor in the Department of Mechanical Engineering at Virginia Tech. My primary academic interests span control theory, robotics, optimization, dynamical systems, machine learning, and cyber-physical systems. My research goal is to establish a firm foundation that will transform state-of-the-art methods for designing resilient and intelligent control algorithms for a wide range of hybrid dynamical systems. These systems include, but are not limited to, 1) autonomous robots for disaster response and industrial applications, 2) cooperative multiagent systems with decentralized and distributed control policies, 3) walking and running robots with human/animal morphology, 4) complex systems, and 5) wearable robots like prostheses and orthoses to improve the quality of life for persons with disabilities. My research has a clear path from theory to experiments to advance two specific objectives: 1) Creating algorithms to systematically design robust and intelligent controllers for high-dimensional and complex hybrid dynamical systems; and 2) Transferring the control framework into practice with highly dynamic robotic systems in my research laboratory. These algorithms advance knowledge in the design of feedback controllers for dynamical models arising from robot locomotion. The theoretical innovations also offer a unique opportunity to advance robotic legged locomotion, bio-inspired robotic technologies, robot-assisted walking, human-robot interaction, and high-tech tools for disaster response.

Education

○ Postdoctoral Research Fellow in Electrical Engineering (Control Engineering)

Department of Electrical Engineering and Computer Science, University of Michigan, Ann Arbor, MI, USA, January 2012 to August 2014

- Advisor: Prof. Jessy W. Grizzle (University of Michigan, USA)

○ Ph.D. in Electrical Engineering (Control Engineering)

Electrical Engineering Department, Sharif University of Technology, January 2007 to June 2011

- Advisors: Prof. Nasser Sadati (Sharif University of Technology)
- Co-Advisors: Prof. William A. Gruver (Simon Fraser University, Canada) and Prof. Guy A. Dumont (The University of British Columbia, Canada)
- GPA: **4/4**
- Ph.D. Thesis Grade: **Excellent**

○ M.S. in Electrical Engineering (Control Engineering)

Electrical Engineering Department, Sharif University of Technology, September 2004 to September 2006

○ B.S. in Electrical Engineering (Electronic Engineering)

University of Tabriz, September 2000 to June 2004

Professional Experience

- **Assistant Professor**
Department of Mechanical Engineering, Virginia Tech, August 2018 to present
- **Assistant Professor**
Department of Mechanical Engineering, San Diego State University, August 2014 to August 2018
- **Postdoctoral Research Fellow**
Electrical Engineering and Computer Science Department, University of Michigan, January 2012 to August 2014
- **Graduate Student Research Assistant**
Electrical Engineering Department, Sharif University of Technology, January 2007 to June 2011

Funding and Projects

(a) Summary of External Funds

- Total funds raised: \$2,342,555
- Total funds prorated to VT: \$1,412,587
- Total funds prorated to K. Akbari Hamed at VT: \$1,072,621

(b) Active Projects

- NSF Award CMMI #1923216/1923239: *Collaborative Research: Intelligent and Agile Robotic Legged Locomotion in Complex Environments: From Planning to Safety and Robust Control*, **Lead PI: K. Akbari Hamed**, Caltech PI: A. D. Ames, 09/01/19-08/31/22, \$584,483.00 (PI Akbari Hamed's component: \$242,543.00)
- NSF Award ECCS #1924617/1924526: *NRI: FND: COLLAB: Hierarchical, Safe, and Distributed Feedback Control of Multiagent Legged Robots*, **Lead PI: K. Akbari Hamed**, Caltech PI: A. D. Ames, 09/15/19-08/31/22, \$749,823.00 (PI Akbari Hamed's component: \$374,823.00)
- NSF Award CMMI #1906727: *Control of Dynamically Coupled Agile Legged Robots and Bioinspired Robotic Tails*, PI: Bentzvi, **Co-PI: K. Akbari Hamed**, 06/01/19-05/31/22, \$396,036.00 (Co-PI Akbari Hamed's component: \$166,070.00)

(c) Completed Projects

- NSF Award CMMI #1637704/1854898: *NRI: Decentralized Feedback Control Design for Cooperative Robotic Walking with Application to Powered Prosthetic Legs*, **PI: K. Akbari Hamed**, Co-PI: R. D. Gregg, 09/01/16-08/31/20, \$612,213.00 (PI Akbari Hamed's component: \$366,483.00)

Honors and Awards

- **TEDx Speaker**, TEDxPearlStreet, Washington, DC, July 2020
Link: https://youtu.be/_XJqtbiqVRo
- Elected full member of Sigma Xi Scientific Society, 2020
- Ranked **1st** according to GPA among Ph.D. students of Electrical Engineering, major of control, Sharif University of Technology
- Ranked **16th** among more than 10,000 students in the national entrance exam for graduate studies in Electrical Engineering in Iran, 2004
- Ranked **1st** according to GPA among B.S. students of Electrical Engineering, University of Tabriz

Publications

Books
